EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Scott Horstemeyer and Anthony Bonner on 2/24/09.

The application has been amended as follows:

IN THE CLAIMS:

The following claims have been amended as follow:

26. (Currently Amended) A circuit, comprising:

means for monitoring a digital data stream, wherein the means for monitoring [a] the digital data stream comprises [a signal integrity supervisor; the signal integrity supervisor, including] a clock detector including a resistor-capacitor combination coupled to a current mirror, the resistor-capacitor combination configured such that a first output signal is triggered in response to a clock signal input that falls below a minimum frequency[;and means for generating],wherein the means for monitoring is further configured to generate an output signal in response to an anomalous condition in the digital data stream, the output signal including a fault recovery response to reset at least one component when the anomalous condition is detected, wherein [the means for] generating [an] the output signal is responsive to a digital data stream having a
